***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required:

The specification as originally filed does not provide antecedent basis for “a grate partially covering the opening”.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 21,22,24-30 and 32-44 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The original specification does not provide support for the grate “partially covering” the opening. The grate may prevent things from entering the opening and it clearly partially obstructs the opening; however, it does not “cover the opening, either completely or partially”.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 41 and 43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cohen-5078603 in view of Perry, et al.-5015184.

Cohen discloses a tube 11 with an inclined opening 12 at its distal end. However the grate is not disclosed. Perry discloses a grate for covering the distal end of a tube. It would have been obvious to have placed or formed the grate of Perry on the distal

Art Unit: 3731

end of a tube such as that disclosed by Cohen, as this would prevent tissue from entering and clogging the distal port or opening.

Alternatively, it also would have been obvious to have cut the end of the tube 12 disclosed by Perry at an incline, as taught by Cohen, as this provides a larger open area for material or fluids to be aspirated into the tube's distal end without clogging the end.

### ***Response to Arguments***

Applicant's arguments filed 03-29-04 have been fully considered but they are not persuasive.

As stated above, the grate does not "partially cover the opening", but rather partially obstructs it.
